

## Vacuum pumps

Torr provides a variety of vacuum pumps and systems. Clockwise from upper left: Rotary vane pump mounted on 80 gallon vertical tank; Compressed air-operated venturi pump system; Diaphragm vacuum pump; Portable rotary vane pump with manifold.

## Vacuum hardware

Torr manufactures vacuum hoses and probes, and stocks the 2 most popular styles of quick-disconnects used in autoclave, oven, and room temp processes. We provide components for our reusable vacuum bagging systems and manufacture a variety of custom hardware.

## Leak Detectors

For tracking down leak sources, Torr stocks both high-frequency spark generator and ultrasonic leak detectors. Spark generators require a conductive surface below the material being scanned but are the most effective in finding holes

## Custom tools and molded products

Torr is involved in all things pertaining to vacuum laminating, including fabricating molded and seamed silicone rubber products. Clockwise from upper left: Molded silicone rubber covers; Heated vacuum table; Vacuum frames for vacuum processing with platen presses; On-site bonding and repair tools.
